### **Research Publishing Ethics**

The researchers are always requested to follow the ethics in academic and professional writing. The authors are given following instructions to avoid plagiarism and copyright infringements:

- The objectives of the research should be clearly defined.
- The research procedure used should be clearly described in sufficient detail. It should clearly link the previous research to the further advancement.
- The planned research results should be objective.

- The adequate data and its significance, appropriate analysis methods should be adopted.
- The validity and reliability of data should be verified carefully.
- The research should be original and fully referenced.
- Ideas or content reproduced from other sources should be expressly acknowledged.
- The views of the writers quoted, paraphrased or summed up in the research writing should not involve inaccuracies and misrepresentations.
- Conclusions should be confined to and justified by the data of the research.

### **Check Plagiarism:**

Before publishing, the authors should check the authenticity of their research & submit the Plagiarism report to the committee. The author should check the article on website given below:
